

series AM

cleaning systems in stainless steel

The series AM is a modified version of the standard series W/K for automatic and manual cleaning starting from the model size type 60.

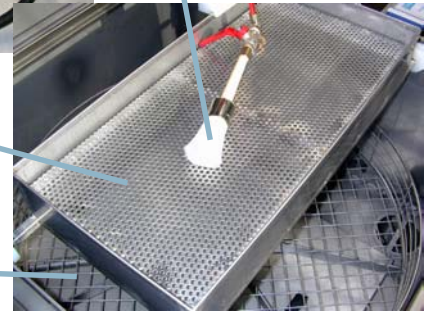

The AM-version was especially developed for the use in the repair range and for the rework of particularly complicated partial geometry.

W/K 60 AM

blow off pistol
high pressure pistol

washing

shiftable and removable
perforated sheet device
(at type W/K 80 AM)

turntable washing basket

Cleaning machines of the series AM are combined machines on basis of the serial machines with following additional components :

- cover with window, lighting and gloves
- low pressure pompe 6 bar (e.g. for rinsing of oil lines and oil channels inside crankshafts or motor blocks etc.)
- washing brush, medium-flooded
- compressed air-blow off pistol option
- high pressure pump 100 bar / 160 bar for removal of persistent dirt (e.g. oil coal)

W/K 80 AM

high pressure pump

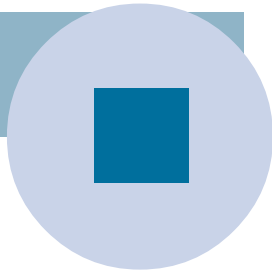

Gladly we make you a specified offer – let us advise you !

series AM

cleaning systems in stainless steel

gloves

All machines can be operated in warm/aqueous range (series W) as well as in a special version also with cold cleaning fluids/solvents (series K).

From machine size 91/92 AM on the washing goods will be cleaned directly on the turn table washing basket.

W/K 92 AM

W/K 115 AM

For technical datas of the individual types please see our folder „basis program“.

Determined by the possibility of a manual in-seize and the EU-standards the loading heights of the individual machine types become larger.

Gladly we make you a specified offer – let us advise you !
